

## Dundas Valley 50-Year Vision and Strategy | 2008-2058

A community oriented strategy with a focus on preserving and enhancing the unique, culture, charm, and environment of the Dundas Valley area.

# Infusing Education and Stewardship in the Community Culture

**Goal: Ensure the community values the Valley's ecological and cultural features**

## Strategic Direction

- Encourage sustainable recreation within the Valley

*This is taken from the original strategic direction which states:*

Develop marketing and visitor attraction plans that focus on the urban wilderness and the proximity of the Valley's beauty to residents

## Actions

- **Educate residents about lesser known conservation sites**
- **Create a new scenic map of the conservation area with points of beauty, vistas, historical info, etc.**

For the Dundas Valley 50-Year Vision and Strategy to be realized and its actions fulfilled the community needs to take on a leadership role.

## Notes
