

# Dundas Valley 50-Year Vision and Strategy | 2008-2058

A community oriented strategy with a focus on preserving and enhancing the unique, culture, charm, and environment of the Dundas Valley area.

## Financial Sustainability and Partnerships

**Goal: Secure long-term,  
sustainable financial resources**

### Strategic Direction

- Acquire and secure lands

*This is taken from the original strategic direction which states:*

**Continue to acquire and secure additional lands for protection in accordance with HCA's land acquisition strategies (2006 Strategic Plan)**

## Actions

- Investigate alternative methods to land acquisition (eg. land easements or land trusts including Ontario Realty Corporation)
- Encourage landowners of Valley properties to continue to donate or sell their lands or participate in stewardship programs to contribute to protection
- Partner with the Nature Conservancy Canada which would secure lands and raise profile of the Valley nationally
- Develop land acquisition plan
- Update protection/acquisition guidelines

For the Dundas Valley 50-Year Vision and Strategy to be realized and its actions fulfilled the community needs to take on a leadership role.

## Notes
