

**Dundas Valley
50-Year Vision
and Strategy |
2008-2058**

**A community
oriented
strategy with a
focus on
preserving and
enhancing the
unique, culture,
charm, and
environment of
the Dundas
Valley area.**

Enhancing the Economic Sustainability and Vibrancy of Dundas Valley Communities

**Goal: Ensure development best
practices that are compatible with
the natural environment**

Infusing Education and Stewardship in the Community Culture

**Goal: Ensure the community
values the Valley's ecological and
cultural features**

Strategic Direction

- Promote “best practices” and demonstration sites on HCA properties

This is taken from two of the original strategic directions which state:

Develop a ‘best practices’ management plan for development and enhancement of HCA owned lands

And

Promote opportunities for demonstration sites

Actions

- **Developments should meet LEED standards or similar standards where feasible**
- **Construction and site management should use best practices environmental management**
- **Utilize ‘triple bottom line’ decision making**
- **Encourage land owners to volunteer their land as a demonstration site (e.g. show your native garden)**

For the Dundas Valley 50-Year Vision and Strategy to be realized and its actions fulfilled the community needs to take on a leadership role.
