

Dundas Valley 50-Year Vision and Strategy | 2008-2058

A community oriented strategy with a focus on preserving and enhancing the unique, culture, charm, and environment of the Dundas Valley area.

Protect and Enhance Dundas Valley Lands

Goal: Protect and enhance the valley's ecology and natural areas

Strategic Direction

- Protect and enhance the health of streams, watercourses and waterfalls

**Dundas Valley 50 Year
Vision and Strategy**

Summary

All public and private landowners have a role to play in the conservation and restoration of the natural environment on the land they own.

The Hamilton Conservation Authority (HCA) is dedicated to the conservation of the natural environment throughout Dundas Valley area. Through the HCA's programs, it undertakes ecological monitoring, promotes biodiversity, regulates the watershed, conserves and acquires land, and is a leader within the community.

Actions

- **Encourage and implement volunteer programs such as annual native planting days and invasive plant picking days (on HCA land)**
- **Identify, monitor and control invasive and nuisance species**
- **Investigate the impacts of climate change on invasive species -develop and implement action strategies**
- **Implement a deer management strategy, including deer count; number of deer the Valley can support, and population control measures**
- **Prevent the entry of new invasive species into the area through targeted education and outreach**

Notes

Resources

Friends of the Greenbelt Foundation; www.greenbelt.ca

A charitable grant-making organization working to help keep farmers successful, strengthen local economies and protect and grow natural features.

Natural Areas Inventory; www.conservationhamilton.ca/natural-areas-inventory-nai

The Hamilton Conservation Authority, and other strategic partners developed the natural areas inventory classifying land to guide human interaction and to assist in the preservation of natural, scientific, and environmentally significant areas.

Ontario Ministry of Natural Resources; www.ontario.ca/page/ministry-natural-resources-and-forestry

Dedicated to the preservation and appropriate use of Ontario's natural resources. Providing legislation and action towards the protection of species, fighting invasive species and all around land management for the mutual benefit of the environment and Ontario's population.

City of Hamilton; www.hamilton.ca

Owens and manages a significant amount of land, and possesses the ability to regulate human activity in relation to the environment, and the built environment.

Royal Botanical Gardens; www.rbg.ca

Focused on natural area sciences, and protection. A community leader in environmental land management and stewardship, as well as a major contributor of environmental educational opportunity.

Cootes to Escarpment; www.cootestoescarpment.ca

The Cootes to Escarpment EcoPark System is a collaborative initiative to protect, restore and connect more than 3,900 hectares (9,600 acres) of natural lands at the western end of Lake Ontario.

Bay Area Restoration Council (BARC); www.hamiltonharbour.ca

A community driven organization focused on the promotion of the Hamilton Harbour and its watershed. Promoting environmental sustainability and actions.

Hamilton Conservation Foundation; www.hamiltonconservationfoundation.ca

The charitable arm of the Hamilton Conservation Authority, assists in the funding of projects for the benefit of the environment and surrounding community; watershed wide.
